

HAELOK® PROTECT.

THE PRODUCT LINE ESPECIALLY FOR FIREFIGHTING TECHNOLOGY.

HAELOK® has developed its own product line called PROTECT especially for the fire protection technology application area, which has been developed with the highest fire safety and fire resistance requirements in mind. Important factors such as sabotage safety, long-term stability and safe installation are easily met by the product line.

HAELOK® – SIMPLE FIRE SAFETY.

PROTECT - THE PROPERTIES.

The PROTECT system has been specially optimized through many years of experience to guarantee simple and clean installation. The line is pressure-resistant, maintenance-free and for use in dry and flooded systems.

PROTECT is identified by the product group «10».

HAELOK® – NO LOOSENING. SAFE. CLEAN.

HAELOK® – THE SYSTEM.

HAELOK® is the leading pure metal to metal press fitting connection system. The high-performance swage fittings are designed for extremely high pressures and temperatures as well as a fast and secure press connection without sealing elements and welding. The system can be safely installed also in existing plants and works without pipe constriction. The specially developed pressing tools always guarantees the same quality of each individual connection. A perfect connection in a few seconds.

**FIRE-RESISTANT. PRESSURE RESISTANT.
SABOTAGE-PROOF.**

PROTECT - PRODUCT LINE.

The system is specially designed for use at high temperatures and high pressures. Available in stainless steel (XX).
